

Hi there!

Here is the detailed report with a rough estimate of your app.

Estimate Item	Hours	Price
1. <input type="text" value="Project setup, architecture, and deployment"/>	50h	\$1950
2. <input type="text" value="Authorization"/>		
<input type="text" value="Via SMS"/>	15h	\$585
3. <input type="text" value="Interactive route map feature"/>	50h	\$1950
4. <input type="text" value="Media functionality"/>		
<input type="text" value="Video support"/>	30h	\$1170
5. <input type="text" value="Notifications"/>		
<input type="text" value="Push notifications"/>	20h	\$780
6. <input type="text" value="List of products, services, options, etc: 3-4"/>	150h	\$5850
7. <input type="text" value="Search & filters functionality"/>	40h	\$1560
8. <input type="text" value="Offline support"/>	30h	\$1170
9. <input type="text" value="Advertising SDK"/>	30h	\$1170
10. <input type="text" value="Analytics SDK"/>	50h	\$1950
Total	465h	\$18135

Additional services	Hours	Price
1. <input type="text" value="Technical risks (e.g. bugs, integration issues)"/>	69h	\$2691
2. <input type="text" value="Code audit & maintenance (e.g. code review, technical documentation) performed by developer(s)"/>	69h	\$2691
3. <input type="text" value="Quality assurance (e.g. testing documents, manual testing) performed by QA engineer(s)"/>	93h	\$3627
4. <input type="text" value="Project management (e.g. planning, reporting, managing the process) performed by a project manager"/>	46h	\$1794
Total (including additional services)	742h	\$28938

Given rough estimate was made to help you plan the budget beforehand. Despite the estimate is based on our previous projects and, therefore, provides extremely close values, it includes solely general features. For a more accurate estimate, we need the User Story, which gives us a clearer understanding of the project. To get your custom detailed estimate, please contact us:
